

Living in God's Economy
A practical guide for Christ-centered households in tough economic times

© Mary Sharon Moore 2009

A brief description . . .

We live in spiritually dangerous times, notes author Mary Sharon Moore in her introduction to *Living in God's Economy*. Dangerous not only because local, national, and world economies have been humbled, but because we are so tempted to resort to anxiety and despair.

Every household is affected in some way by this economic turmoil. And what emerges from it, for Christian households, must be **God's economy** if we are to move beyond our limited personal horizons and into the reign of God. God's economy brings Jesus' insistence on justice and compassionate concern for the human person, the human community, and the created order, back from footnote status to the heart of the matter.

How can Christ-centered households embrace this simpler way of life? *Living in God's Economy* clarifies the prophetic role of the Christian household and offers a three-step process to move your household toward a simpler, more intentional way of living for the good of others, the good of the Earth, for the sake of the Gospel.

Living in God's Economy is available in workbook format for home use, and a one-day workshop for churches that want to explore together the blessed relief of living in God's economy.
